Review Gas Rates **BEFORE** Temps Drop

Georgia winters may be unpredictable, but your natural gas bill doesn't have to be. Before the temperatures drop, take a few minutes to review your natural gas plan and avoid high bills this winter. 3993524

To make the choice easier for our members, Snapping Shoals EMC partnered with Walton Gas more than five years ago. Through our partner program, our members have access to an exclusive natural gas rate from a Georgia-based company that shares Snapping Shoals EMC's commitment to trusted service, transparent billing and putting people first.

One of the most important things to know before winter arrives is whether you're enrolled in a fixed-rate or variable-rate plan. According to Phil Weatherly, Director of Business Development at Walton Gas, customers should review their current rate before temperatures drop. 4491332

"Many providers offer attractive introductory rates, but those rates can change after a short period," Weatherly says. "Locking into a fixed-rate plan can help protect you from unexpected bill increases and make your monthly energy costs more predictable."

Whether you're shopping for a new natural gas provider or simply reviewing your current plan, now is a great time to speak to the Walton Gas team about your service.
